VoltWay EV Charging - Customer Handbook 2026

1. About this handbook

This handbook explains how VoltWay charges customers for public EV charging in India, including tariffs, fees, membership benefits, refunds and service levels. It applies to all sessions started through the VoltWay app, an RFID card, or a station QR code from 1 April 2026.

Fleet customers with a signed Fleet Partner Agreement follow that agreement wherever it differs from this handbook.

2. Charger types

AC chargers: 7.4 kW and 22 kW, found at malls, offices and residential societies.

DC fast chargers: 60 kW, found at city hubs.

DC ultra-fast chargers: 150 kW, found only at highway stations (for example Mumbai-Pune Expressway, Delhi-Jaipur NH48, Bengaluru-Mysuru Expressway).

3. Energy tariffs

Energy is billed per kWh delivered to the vehicle, as measured by the charger meter.

AC chargers: Rs 14 per kWh. DC fast chargers (60 kW): Rs 21 per kWh. DC ultra-fast highway chargers (150 kW): Rs 24 per kWh.

Peak-hour surcharge: on weekdays between 6 pm and 10 pm the energy rate is increased by 10% at city stations. The peak-hour surcharge does not apply at highway stations.

Weekend highway surcharge: on Saturdays, Sundays and national holidays, highway stations add Rs 2 per kWh to the energy rate.

All charges (energy, surcharges, idle fees and other fees) are subject to 18% GST, applied on the final amount after any membership discount.

4. Idle fees

Idle fees encourage drivers to free up chargers. After charging completes, a grace period of 10 minutes applies for Basic customers.

After the grace period, the idle fee is Rs 5 per minute on DC chargers (fast and ultra-fast) and Rs 2 per minute on AC chargers.

Idle fees are capped at Rs 600 per session.

5. Membership plans

Basic: free. Standard tariffs and a 10-minute idle grace period.

VoltPlus: Rs 499 per month. 15% discount on the energy charge, including the weekend highway surcharge and the peak-hour surcharge. The discount does not apply to idle fees, booking fees or RFID card fees. VoltPlus members get an extended idle grace period of 20 minutes.

VoltFleet: available only to businesses under a Fleet Partner Agreement. See that agreement.

6. Booking a charger

Chargers can be reserved up to 15 minutes in advance for a booking fee of Rs 50. The booking fee is adjusted against the session bill if the customer starts charging within the reserved window. If the customer does not arrive, the booking fee is forfeited.

7. Failed sessions and refunds

Charger-fault failure: if a session stops within the first 5 minutes because of a charger fault (fault code shown on the charger or in the app), the customer receives a full automatic refund of any amount charged for that session within 7 business days. No request is needed.

Low delivery: if less than 1 kWh was delivered in a session for any reason other than the customer stopping it, a full refund is available on request.

Customer-caused stops (unplugging early, stopping in the app, vehicle-side errors) are not refundable; only the energy actually delivered is billed.

How to request a refund: open the VoltWay app, go to Help > Session issue, select the session and submit within 30 days of the session. Refunds go to the VoltWay wallet within 3 business days, or to the original payment method within 7 to 10 business days.

8. RFID cards

A VoltWay RFID card costs Rs 299 to issue; a replacement costs Rs 199. A lost card must be blocked immediately in the app under Profile > RFID cards. Any transaction made with a lost card after it has been reported is fully refunded. Transactions before the report are the cardholder's responsibility.

9. Wallet

The minimum wallet recharge is Rs 100. Wallet balance does not expire. Wallet balance is not withdrawable to a bank account except when the account is closed.

10. Fault reporting and service levels

Faults can be reported in the app or on the 24x7 helpline 1800-000-8658.

Priority 1 (safety issue, e.g. damaged cable, sparks): engineer on site within 2 hours.

Priority 2 (charger not working): fixed within 24 hours.

If VoltWay misses a service level on a fault reported by a customer, that customer receives a Rs 100 wallet credit.
