VoltWay Fleet Partner Agreement - Standard Terms 2026

1. Scope

These terms apply to businesses operating electric fleets (taxis, delivery, logistics, buses) that have signed a VoltWay Fleet Partner Agreement. Where these terms are silent, the VoltWay Customer Handbook 2026 applies.

2. Fleet volume discounts

Fleet partners receive a discount on energy charges based on total energy used across all their vehicles in a calendar month:

Tier 1 - less than 2,000 kWh per month: 10% discount.

Tier 2 - 2,000 to 10,000 kWh per month: 18% discount.

Tier 3 - more than 10,000 kWh per month: 25% discount.

The volume discount applies to energy charges only, at both public stations and partner depots.

3. Depot charging

Chargers installed at the partner's own depot are billed at a night rate of Rs 11 per kWh for sessions between 11 pm and 6 am, and Rs 16 per kWh at all other times.

Fleet vehicles get a 30-minute idle grace period at all VoltWay chargers, after which handbook idle fees apply.

4. Minimum commitment

Fleet partners commit to a minimum of 1,000 kWh per month. If monthly usage is below the minimum, a shortfall charge of Rs 3 per kWh is billed on the difference.

5. Invoicing and payment

Fleet usage is invoiced monthly. The invoice amount is energy charges after the volume discount, plus any idle fees and shortfall charges, plus 18% GST. Payment is due within 30 days of the invoice date (net-30). Late payments attract interest of 1.5% per month.

6. Fleet service levels

Depot chargers are covered by an enhanced service level: Priority 2 faults (charger not working) are fixed within 12 hours.

For each missed service level, the partner receives a credit of 5% of that month's invoice amount before GST, up to a maximum of 20% per month. Credits are applied to the next invoice.

7. Termination

Either party may terminate with 60 days' written notice. Unused credits are settled in the final invoice.
